

# Getting Started

**Creative LEGO® DUPLO Brick Set | 45019 |**  
Ages 3-5 | For 2-6 children

The Creative LEGO® DUPLO® Brick Set ignites creativity and collaboration! The building cards are designed to inspire open-ended construction, and the ideas below encourage new ways of using the set.

1. Use the set in a small group. Pick a category and ask children to build an item that belongs in the category. For instance, if the category is transportation, children may build an airplane, boat, or spaceship. Ask children to explain why each item belongs in the category.

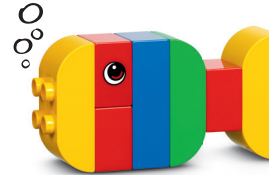

2. Use the set for creativity. Encourage children to select a building card and build the model on the card, for instance, the flower. Then ask them to create their own version of the model, for instance, another kind of flower. Discuss the similarities and differences.

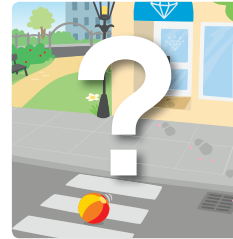

3. Use the set for self-expression. Encourage children to each build a character. Then tell a story together including each of their characters.

4. Use the set for various themes, such as nature, animals, and community. For instance, discuss animals, and prompt children to build an animal and its habitat or home.

5. Use the set for problem solving. For instance, tell children a friend needs to cross a busy street. Encourage children to work together to build a solution, like a pedestrian bridge or traffic light, and describe.

## Learning Objectives

- Creative exploration
  - creativity
  - self-expression
- Physical development
  - fine motor skills
