# The World's first *TOTALLY AWESOME* Kid-Led AI Study

## How we did it

12 kids from the US went into a room (the adults side it was called a "focus group"). They asked us to help write a survey about AI. Then we sent it to 800 kids in the US, Germany, South Korea, and Australia so we could hear what THEY think.

go actually and curious row this

We're excited about AI! We've been hearing a LOT about AI lately...

and guess what?

some people think it's scary, and we get that, but we also think

it's awesome!

to this

**over half**
of us think AI can help us learn more, faster
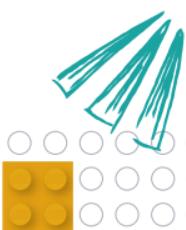

**90% of us**
want more ways to use AI

# We have a lot of AI ideas!

"Invent a supersonic airplane that can fly very fast!" swooooosh!!

14-year-old, US

"Help deaf children translate what others say into text"

10-year-old, South Korea

"Explore space, create cool inventions, and help animals"

10-year-old, US

"Translate any language at all" hello! bonjour! 안녕!

12-year-old, Australia

The future looks pretty cool (and FAST!)

# We wanna use it to do BIG things!

## LIKE SAVE THE WORLD! LEVEL

Improve education and healthcare.

10-year-old, Australia

Reduce inequality and help people understand each other.

13-year-old, US

Help disadvantaged people like elderly people or disability people!

12-year-old, Australia

Find solutions to diseases, poverty, and homelessness.

11-year-old, South Korea
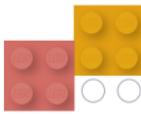

If we could control AI for a day, **93% of us** would use it to help others and society at large

# We already know some things about AI!

> ...Since we grew up with it (AI) and we were born with it around, it's easier for us to get used to it.
>
> 12-year-old, US

**83% of us** use AI to help better understand a question or assignment

**76% of us** use AI to get ideas or inspiration/ brainstorming

**84% of us** check if the information we get from AI is true

# But there's TONS still to figure out!

I feel like there's like a lot more to learn about AI 👍

12-year-old, US

**54%** of us agree that AI is changing our lives, so we need to learn how to navigate it

**89%** of us think it's super important to learn how to use AI safely, understand what it's saying, and make sure what it tells us is true

**43%** of us think it's unfair that not everyone gets to learn about AI at school

**96%** of us think it's good to have rules when using AI

What does fair look like?

# But there's a humongous problem:

## Nobody asks us what we think

**83%** of us confirm: Adults make ALL the decisions about AI at school

ALLLLL!

Big yikes!

**65% of us** feel left out of the AI conversation!

**Half of us** aren't asked for our opinions or included in conversations about how to teach AI *

*If we're the ones growing up in an AI world, shouldn't we get to help decide how we learn it?*
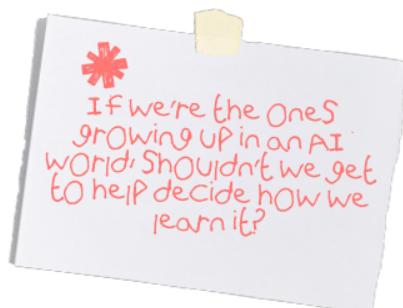

So, teachers, principals, grown ups...

we have a proposal for you should you choose to accept it

Let's learn more about AI TOGETHER.

We have tons of ideas for our school's AI policy that we think will help everyone.

And we even have some ideas on how to make a super fun class on AI! *

* And like maybe we'll save the world????

Because this stuff matters to all of us

THE END
