### Using WeDo 2.0 on Windows 10 without built-in BLE will cause this error while trying to connect

## Avoid connection error by:

First you must exit WeDo
Insert BLE dongle into computer USB port.

# Install driver

3. Let Windows 10 search for and install a new driver for the BLE dongle.4. Wait until the driver has been installed.

## Start WeDo

5. When the new driver has been installed start WeDo.

### 6. Open a project book

7. Open connection panel

### 8. Turn on WeDo Block

## 9. Connect by clicking the WeDo Block you want to connect to

#### 10. Connection is now established
