

Quick Start Guide

LEGO® Education Early Simple Machines

1. Unpack and Organize

Unpack the LEGO® brick set.

2. Teacher Preparation

Download the curriculum pack from the URL that is printed on the lid of each set, or visit: www.LEGOeducation.com/start

Choose the activity you would like to do.

The recommended progression is:
1. Activities (observe how Early Simple Machines work)
2. Problem-Solving Activities

To see standards alignment view our curriculum mapping..

3. Classroom Preparation

Plan to spend one lesson on each of the activities and two lessons on each of the Problem-Solving Activities.

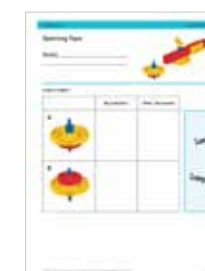

These four tools can help you to facilitate each lesson:

Teacher's Notes: Guided questions, suggestions on how to structure your lessons, and an Observation checklist to track student progress.

Illustration Cards: Ignite a discussion with your students by asking questions about what they see in the illustrations.

Building Instructions: Help your students to build independently, without your assistance.

Student Worksheets: Each worksheet guides the students through the learning experience and with a self-assessment rubric.
