

Make a Sound Machine

Maker Connect

Close your eyes and listen. Sounds are all around us! Where can you hear sounds coming from?

Sounds come from nature, animals, objects, and machines. Sounds can make rhythms, and sounds can make music. Sounds can wake you up, warn you of danger, or entertain you. Sometimes sounds are just noise.

Look at the photos, then think about these questions.

- What do you see?
- What questions do you have?
- What ideas do you have?
- What can you make?
- Can you make your own sound machine?
