

## Additional Teacher's Notes

### Optional Materials

- Cardboard or paper
- Fabric scraps for decoration
- Coloured felt pens or pencils

### Prior Learning

Before beginning this Maker activity, it is recommended that students know how to use the on-brick motor control function, and also how to program a motor to move.

Students can also try connecting two motors together, this is a great way to explore movement.

### Tinkering Examples

Some students may need a little inspiration and scaffolding to help them get started. Students can remix an existing model, or invent a new design.

**Note:** You are advised not to share these images with students.
